Abstract

After forgery in the official letters became a crime threatening the trust and continuity in the official transactions through following different and Various ways by forgerers ranging from imitating imitating handwriting and stamps and tricks played to get them , it became quite necessary to combat this phenomenon and to prevent it . This was realized through finding out serious and active methods that are instrumental in preventing forgery in the official letters .

In order to protect the exchange of those official letters and in order not to lose the trust offered by the members of the society , methods vary in lin with the ways of forgery Although those ways could not halt forgery, they revertheless , helped decrease its prevalence .
