Abstract

Targeted study has two aims ,the first one is the perception measurement of universities students to the psychological counseling , while the second one is the knowing of the universities students perception males and females , to achieve the aims of this study the researcher built tool to measure universities students perception to the psychological counseling services.

The researcher applied this tool , after processing the study concluded that there is no perception to the psychological counseling services.

In delight of the study , the researcher submitted group of recommendations and suggestions .
