Abstract

The subject concentrated on how to deal with operation of commercial dumping in Iraq through explaining the dumping operation and its damages . that is of course will lead to solve Iraq problems and start to build its economy on new scientific bases to get to development .

2010/12/21

2010/10/27

in order to cover these subjects the research contained about nine points starting from dumping its kinds and its conditions and trading policy in Iraq . finally it dealt with the reasons of dumping operation and its effects on Iraq economy and the suggestion to face the dumping . the researcher got some points by which he thought to face the dumping .

these points are :-

- 1- activating the laws which concern with preventing the dumping operation according to the code No.23 for the year 1984 . and also activating the law of production of Iraq products which the parliament of Iraq has issued in year 2009 .
- 2- it is necessary to every trader to get licenses to import that the Iraq trade chamber issued .
- 3- it should return to use the laws and procedures of the industrial development foundation and activate the Agriculture and agricultural bank procedures that is suitable to Iraqi economy .
