#### Abstract

This paper presents a field study in the libraries of the University of Basra to see the quality standards that must be met by working in Libraries in order to switch to digital libraries, and the impact of the culture of information technology (Internet and computers) to the library professionals and managers to provide services In this type of library. And by clarifying the definition of digital libraries and other terms, calling them and ways of implementation and its relationship with workers in libraries will be working on a p- Based on recent trends - which must be available in libraries and information specialists, which will measure the level of services to be provided in the libraries of the future at the university.roposal quality standards.
